Dear Beef Producers,

Mother nature has certainly reminded us that she is still in control of so much of what we do? It has caused everyone to reexamine what works individually for their own programs. We have done the same here at Varilek CT Angus.

Varilek CT Angus invites you take a hard look at using a two year old this year. Some of the benefits of using an older bull versus a yearling bull may make more sense for your program. A mature sire will cover more cows in a breeding season. With grass and feed in short supply this means fewer mouths to feed. The reason that we sell two year old bulls is that it allows us to take the bull and grow him as a breeding animal instead of a terminal one. They are not fed creep as calves and are allowed to grow at their own rate instead of being pushed as a yearling bull and then run out on grass during the summer to promote a more healthy development. We expect the bulls to hold their condition and performance the entire breeding season. One of the top complaints (and even in our camp) is feeding herd bulls in the offseason. Yearling bulls often come off grass needing quite a few groceries to get back in shape to perform next year. By using a two year old that has been properly conditioned, you should have less expense going into the next season.

Varilek CT Angus knows that you have many options when purchasing your breeding stock. We thank you for taking the time to look at our program and see if it something that will work. Please feel free to call or stop by if you have any questions regarding our program.
